1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 8-10 are rejected under 35 U.S.C. 101 because the final step of merely determining would not appear to be sufficient to constitute a tangible result, since the outcome of the determining step in claim 8 is not being claimed in a disclosed practical application nor is it outcome being made available in such a manner that its usefulness in a disclosed practical application can be realized. See OG Notices: 22 November 2005, "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility".

Claims 9 and 10, dependent from claim 8, are similarly rejected because neither of these claims add to their parent claim the required practical application or make the outcome available in such a manner that its usefulness in a disclosed practical application can be realized.

3. Claim 1, amended to include the subject matter of previous claim 2, and claims 3-6 dependent therefrom are allowable for the reasons set forth in the previous office action. Claims 8-10 are allowable over the art of record for the reasons set forth in the previous office action and would be allowable were the rejection under 35 USC 101 above overcome.

Art Unit: 2877

4. The preliminary amendment filed 6 December 2004 has been received. The claims not stand as amended by the paper filed 2 August 2006.
5. The drawings filed 21 January 2004 have been accepted by the examiner.
